MUSIC PLAYLIST MANAGER

~By V.B.Kumar

ABSTRACT

- This project implements a Music Playlist Manager using a Doubly Linked List in C++.
- It allows users to add, delete, search, and navigate songs efficiently.
- The application follows menu driven approach.
- Overall the project provides a clear understanding of linked lists, pointer manipulation, and dynamic data handling in C++.

INTRODUCTION

- • Playlist is a collection of songs
- • Uses Doubly Linked List
- • Each node represents a song.
- • Supports add, delete, search, next, previous
- • A pointer is also maintained to track the currently playing song.

ALGORITHM

- 1. Start
- 2. Display menu
- 3. Take choice
- 4. Perform operation
- 5. Repeat
- 6. Stop

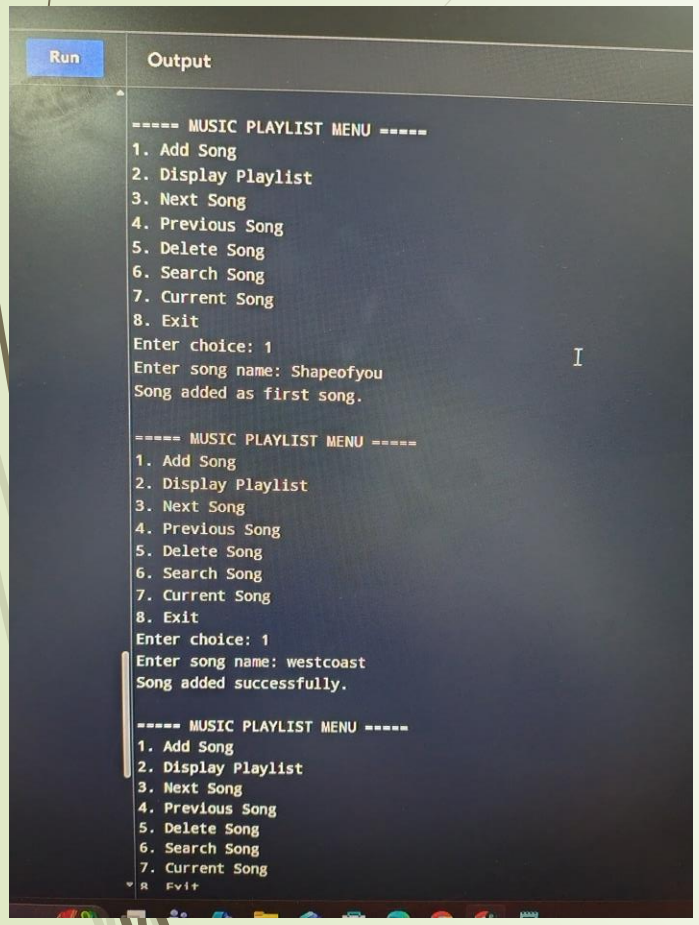
FLOWCHART

- Start → Menu → Choice → Operation → Repeat → End
- The above mentioned is the short overview of the flowchart for the project Music playlist manager.
- Operations are in vast amount and you will be able to see as you run the code.

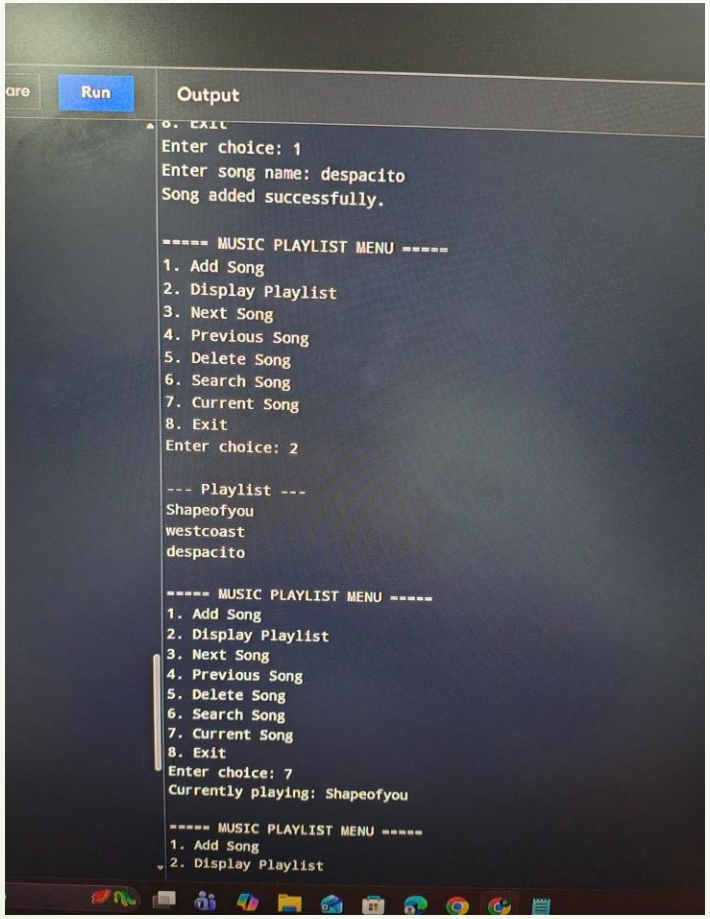
METHODOLOGY

- • Doubly Linked List
- • Node: song, next, prev
- • Head & current pointers
- • Insert, delete, traverse

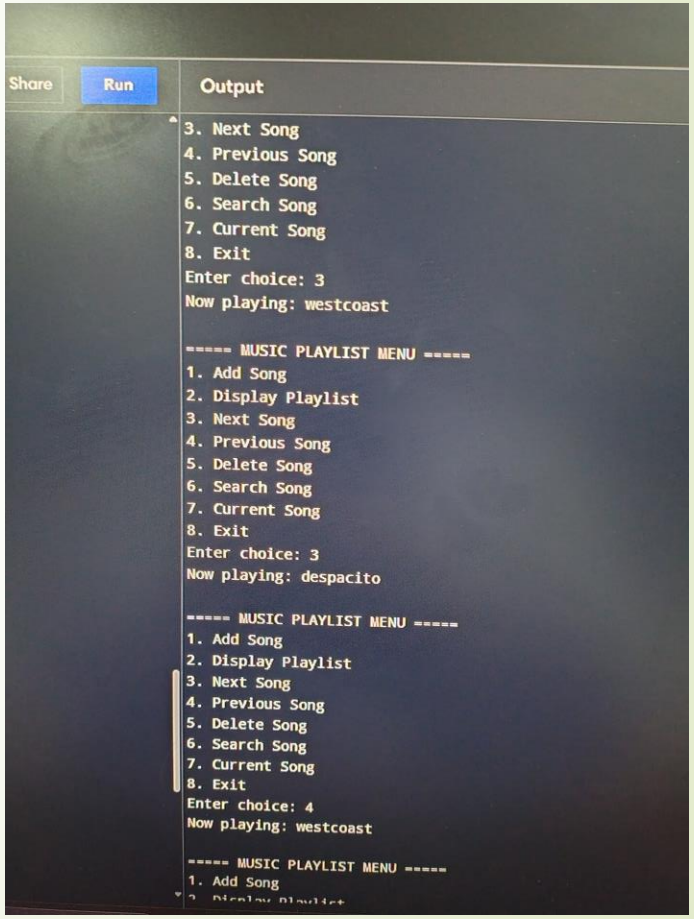
RESULTS



Run
Output
===== MUSIC PLAYLIST MENU =====
1. Add Song
2. Display Playlist
3. Next Song
4. Previous Song
5. Delete Song
6. Search Song
7. Current Song
8. Exit
Enter choice: 1
Enter song name: Shapeofyou
Song added as first song.
===== MUSIC PLAYLIST MENU =====
1. Add Song
2. Display Playlist
3. Next Song
4. Previous Song
5. Delete Song
6. Search Song
7. Current Song
8. Exit
Enter choice: 1
Enter song name: westcoast
Song added successfully.
===== MUSIC PLAYLIST MENU =====
1. Add Song
2. Display Playlist
3. Next Song
4. Previous Song
5. Delete Song
6. Search Song
7. Current Song



Run
Output
Enter choice: 1
Enter song name: despacito
Song added successfully.
===== MUSIC PLAYLIST MENU =====
1. Add Song
2. Display Playlist
3. Next Song
4. Previous Song
5. Delete Song
6. Search Song
7. Current Song
8. Exit
Enter choice: 2
--- Playlist ---
Shapeofyou
westcoast
despacito
===== MUSIC PLAYLIST MENU =====
1. Add Song
2. Display Playlist
3. Next Song
4. Previous Song
5. Delete Song
6. Search Song
7. Current Song
8. Exit
Enter choice: 7
Currently playing: Shapeofyou
===== MUSIC PLAYLIST MENU =====
1. Add Song
2. Display Playlist



Share
Run
Output
3. Next Song
4. Previous Song
5. Delete Song
6. Search Song
7. Current Song
8. Exit
Enter choice: 3
Now playing: westcoast
===== MUSIC PLAYLIST MENU =====
1. Add Song
2. Display Playlist
3. Next Song
4. Previous Song
5. Delete Song
6. Search Song
7. Current Song
8. Exit
Enter choice: 3
Now playing: despacito
===== MUSIC PLAYLIST MENU =====
1. Add Song
2. Display Playlist
3. Next Song
4. Previous Song
5. Delete Song
6. Search Song
7. Current Song
8. Exit
Enter choice: 4
Now playing: westcoast
===== MUSIC PLAYLIST MENU =====
1. Add Song

CONCLUSION

- • Playlist manager implemented
- • Efficient navigation
- • Can be extended further
- • Highlights advantages of using dynamic data structure.
- • In future, additional features such as shuffle mode, repeat functionality, graphical user interface, and file storage can be implemented.
